“

HyperExecute evolved our testing process at Lereta. By minimizing network traffic, it dramatically reduced execution times. It's a more efficient way to manage test environments - just a click away from faster, more effective testing.

**Todd Lemmonds**  
VP of Quality Assurance,  
Lereta LLC

# Introduction

Lereta, a leading provider of real estate tax and flood services in the United States, faced significant hurdles in their testing process. They needed faster and more dependable testing, especially within a tight development timeline. To tackle this, Lereta adopted TestMu AI and employed the HyperExecute solution, which was designed to speed up test execution.

## About Lereta

Lereta, a leading US provider of real estate tax and flood services, brings over 30 years of industry experience. They offer property tax data and flood determination services to help mortgage lenders and servicers comply with evolving regulations.

Beyond their top-notch services, Lereta prioritizes client relationships. They collaborate closely with clients, tailoring their support to individual needs for a seamless experience. With their unwavering commitment to precision, compliance, and customer satisfaction, Lereta remains a trusted name in real estate tax and flood services.

### At a glance

#### Industry :

Financial Services

#### Challenge :

Lerata needed to test their software faster and more reliably, especially during the development pipeline, which was a critical requirement.

#### Product : [HyperExecute](#)

#### Key Highlights :

With HyperExecute, Lereta achieved faster test execution, and consistent test results, thereby, releasing new features and bug fixes more quickly, and it provides a better user experience to its customers.

# Lereta's Struggle To Achieve Faster Test Execution With Reliable Results

Lereta's software testing process was mired in challenges that impeded their ability to meet their quality assurance objectives efficiently, impacting their software releases. The key challenges included:

- **Sluggish Test Execution:** Lereta's existing test execution process was time-consuming and inefficient. It took hours to execute a test that should have taken less than 10 minutes, delaying the release of new features and bug fixes.
- **Inconsistent Test Results:** Inconsistent test results made it difficult for Lereta to identify and fix bugs. This delayed the release of new features and bug fixes, which impacted the overall customer experience.
- **Flaky Tests:** Lereta encountered a substantial number of flaky tests, affecting the dependability and efficacy of their testing process. These testing yielded inconsistencies, resulting in false positives and negatives and making it difficult to identify true problems.
- **Lack of Customer Support:** Lereta's existing test execution tool did not offer adequate customer support. They were looking for a solution that was more customer-focused and offered a better customer support experience.

# Achieving Lightening Fast Test Execution With Nearly Zero Flakiness

Faced with these challenges, Lereta sought a comprehensive solution that could tackle their testing woes head-on. TestMu AI Hyperexecute emerged as the perfect choice, and here's how it transformed Lereta's testing landscape:

- ✓ **Faster Test Execution:** TestMu AI HyperExecute uses a distributed cloud infrastructure to execute tests in parallel, thereby reducing any network latency. This helped Lereta in achieving significantly faster test execution, especially for large test suites.
- ✓ **Stable Infrastructure:** TestMu AI's stable infrastructure and dependable network ensured consistent test results, allowing Lereta to identify and treat actual concerns- with nearly 0 flakiness.
- ✓ **Insightful Dashboard:** HyperExecute's dashboard centralizes test information, saving time on searching. The automatic report tool simplifies report sharing with one-click functionality. It also offers reliable tests with self-healing, retries, and detailed logs.
- ✓ **Customer-First Approach:** TestMu AI offers Lereta with customizable test environments and add right dependencies to their runners using pre and post-scripts. Further, they were happy with the customer support offered by TestMu AI during the demos and beyond.

**LambdaTest (Now TestMu AI) is creating that next level of efficiency around test automation so that people can actually focus on testing versus test orchestration.”**

Satya Nadella, CEO, Microsoft

# Lereta Achieves Faster Test Execution With TestMu AI

TestMu AI's Test orchestration and execution solution - HyperExecute helped Lereta to improve its test execution process significantly by reducing network traffic. This resulted in 70% faster test execution, consistent test results, and the ability to meet fast test results requirements in the development pipeline.

The cloud based test orchestration platform co-locates the test execution environment and the browser instance. This eliminates the need to send data back and forth over the network, which further reduces the test execution time.

# About TestMu AI

TestMu AI (Formerly LambdaTest) is a fully autonomous agentic quality engineering platform that empowers teams to test intelligently, smarter, and ship faster. Over 10,000+ customers and 2 million+ users across 132+ countries rely on TestMu AI for their testing needs.

**1.2 Bn+**

Tests

**2M+**

Users

**10K+**

Enterprises

**132+**

Countries

## **Exploratory Testing**

Enhance web and app quality to ensure seamless user experience with real-time, live, exploratory testing on 10,000+ devices.

## **KaneAI**

Boost testing efficiency with an AI platform that uses natural language to create, debug and evolve tests.

## **Test Manager**

Streamline test creation, management, & reporting for improved efficiency with AI - native unified Test Manager.

## **Automation Cloud**

Accelerate product releases with secure, scalable, end-to-end test automation in the cloud.

## **Real Device Cloud**

Test on 10,000+ real Android and iOS devices, and 3000+ browser combination cutting costs while ensuring compatibility.

## **HyperExecute**

Accelerate testing speed by 70% with AI-Native orchestration for faster digital transformation.

## **Accessibility Testing**

Ensure inclusive, accessible websites with TestMu AI's manual and automated Accessibility Testing tool.

## **Visual UI Regression**

Achieve UI perfection quickly with AI-Native visual regression testing across all platforms.
